PROJECTS

Recruitment Management System

▣ It is a simple project that will help a certain company manage their recruitment or job hiring process, and also can be accessed online. The purpose of this project is to help a certain company store, process, manage, and track all the data that are related to their recruitment processes.

Exam Cell Automation System

▣ This system allows students to enroll themselves into the system by registering their names or by sharing details to admin. This is done by providing their personal and all the necessary details like Name, email, examination, semester, etc

Test Coverage Analyzer for Object Oriented Programs

▣ It is a Python based application that allows to take a Java Code file as input then provides some options such as Condition Coverage, Path Coverage, Function Coverage and Draw Control Flow Graph(CFG) for the Java Code file. The actions will be performed and displayed in the screen as well as save a copy as pdf form in the system.
